Summary

Full stack developer with 1+ year of paid remote experience shipping production features for a US-based multiplayer gaming platform and a freelance client's WhatsApp marketing SaaS. Build web applications with React, Next.js and TypeScript, backed by REST APIs, authentication and MySQL or MongoDB databases, and use AI coding tools to ship quickly. Pursuing a B.E. in Computer Engineering alongside work.

Experience

Legacy Network (US-based) Aug 2025 – Present
Full Stack Developer *Contract · Remote*

- Build in-game user interfaces in **React** and **Svelte** for a live multiplayer GTA V roleplay server.
- Write client- and server-side logic in **Lua** and connect it to the React/Svelte frontends through an event-based messaging layer (FiveM NUI).
- Ship features to a live production server, working remotely with the US-based owners across time zones from request to deployment.

Freelance – WhatsApp Marketing Platform (client project) May 2026 – Jun 2026
Full Stack Developer *Remote*

- Customized and extended a production WhatsApp marketing SaaS for a client, built on **React**, **TypeScript**, Express, **PostgreSQL** (Drizzle ORM), Redis/BullMQ and Socket.io.
- Shipped features including a random message-template rotation system, per-account channel limits for super admins, group exclusion, and reply tracking in campaign analytics with Excel exports.
- Fixed campaign reliability issues, including completion checks for queued messages, retry handling, contact imports and automation keyword matching.
- Deployed and maintained the app on a **Linux VPS** with **Nginx** and **PM2**, including build scripts and database schema migrations.

Projects

Inventory & Billing System | *Next.js, TypeScript, MySQL, NextAuth, Tailwind CSS* GitHub

- Built a full-stack inventory and billing app with NextAuth authentication and a MySQL database.
- Implemented product and stock tracking with GST-inclusive bill generation.
- Added a dashboard with data visualization, dark/light mode and a fully responsive UI.

Personal Finance Visualizer | *Next.js, TypeScript, MongoDB, shadcn/ui* GitHub

- Designed 7 REST API endpoints for transactions, budgets and dashboard analytics on MongoDB Atlas.
- Built monthly expense charts and category budgets, with 5-second auto-refresh and cross-tab sync.
- Added paginated loading (10 records per page), persistent dark mode, and deployed on Vercel.

UniMart – University Marketplace | *PHP, MySQL, JavaScript, AJAX, Bootstrap* GitHub

- Developed a multi-role e-commerce platform with separate admin, seller and buyer portals.
- Built product search, cart, checkout with coupons, and order tracking; admins can moderate products and ban or unban users.
- Secured the app with password hashing, session management, input validation, and protection against SQL injection and XSS.

Technical Skills

Languages: JavaScript, TypeScript, Python (basic), PHP, Lua, SQL, HTML/CSS
Frontend: React, Next.js, Svelte, Tailwind CSS, shadcn/ui
Backend: Node.js, Next.js API routes, REST APIs, NextAuth
Databases: MySQL, MongoDB (Atlas)
Tools & Deployment: Git, GitHub, Vercel, Linux VPS, Nginx, PM2, AI coding assistants

Education

Monark University Ahmedabad, Gujarat
B.E. in Computer Engineering *2025 – Present*

LJ Polytechnic (Lok Jagruti Kendra University) Ahmedabad, Gujarat
Diploma in Computer Engineering *2021 – 2024*
